INDEX

Sr.no		Practical	Date	Sign
1	a	Install NLTK		
	b	Convert the given text to speech.		
	c	Convert audio file Speech to Text.		
2	a	Study of various Corpus – Brown, Inaugural, Reuters, udhr with various methods like filelds, raw, words, sents, categories.		
	b	Create and use your own corpora (plaintext, categorical)		
	c	Study Conditional frequency distributions		
	d	Study of tagged corpora with methods like tagged_sents, tagged_words.		
	e	Write a program to find the most frequent noun tags.		
	f	Map Words to Properties Using Python Dictionaries		
	g	Study DefaultTagger, Regular expression tagger, UnigramTagger		
	h	Find different words from a given plain text without any space by comparing this text with a given corpus of words. Also find the score of words.		
3	a	Study of Wordnet Dictionary with methods as synsets, definitions, examples, antonyms		
	b	Study lemmas, hyponyms, hypernyms.		
	c	Write a program using python to find synonym and antonym of word "active" using Wordnet.		
	d	Compare two nouns		
	e	Handling stopword		
4	a	Text Tokenization: Tokenization using Python's split() function		
	b	Tokenization using Regular Expressions (RegEx)		
	c	Tokenization using NLTK		
	d	Tokenization using the spaCy library		
	e	Tokenization using Keras		
	f	Tokenization using Gensim		
5	a	Import NLP Libraries for Indian Languages and perform: word tokenization in Hindi		

	b	Generate similar sentences from a given Hindi text input		
	c	Identify the Indian language of a text		
6	**a**	Illustrate part of speech tagging. Part of speech Tagging and chunking of user defined text.		
	b	Named Entity recognition of user defined text.		
	c	Named Entity recognition with diagram using NLTK corpus – treebank		
7	**a**	Finite state automata Define grammar using nltk. Analyze a sentence using the same.		
	b	Accept the input string with Regular expression of Finite Automaton: 101+.		
	c	Accept the input string with Regular expression of FA: (a+b)*bba.		
	d	Implementation of Deductive Chart Parsing using context free grammar and a given sentence.		
8		Study PorterStemmer, LancasterStemmer, RegexpStemmer, SnowballStemmer Study WordNetLemmatizer		
9		Implement Naive Bayes classifier		
10	**a**	Speech Tagging: i. Speech tagging using spacy, ii. Speech tagging using nltk		
	b	Statistical parsing: i. Usage of Give and Gave in the Penn Treebank sample, ii. probabilistic parser		
	c	Malt parsing: Parse a sentence and draw a tree using malt parsing.		
11	**a**	Multiword Expressions in NLP		
	b	Normalized Web Distance and Word Similarity		
	c	Word Sense Disambiguation
